SUMMARY

Detail-oriented Full Stack Developer with hands-on experience in developing enterprise-level applications using Spring Boot and React.js. Skilled in designing REST APIs, implementing CRUD functionalities, and ensuring responsive UI design. Strong team player with knowledge of SDLC, debugging, and client-focused delivery.

EDUCATION

Chandigarh Group of Colleges, Landran, Punjab <i>B.Tech in Computer Science and Engineering, CGPA: 8.60</i>	Aug 2021 – Dec 2025
Lord Mahavir Jain Public School, Ambala Cantt, Haryana <i>PCM, Percentage: 81.6%</i>	May 2020 – May 2021
Lord Mahavir Jain Public School, Ambala Cantt, Haryana <i>Matriculation, Percentage: 78.6%</i>	May 2018 – May 2019

PROJECTS

- Cognivanta** | *Java, Spring Boot, REST APIs, MySQL, Maven, Git, React JS, Postman*
- Built end-to-end full-stack modules using React.js (Frontend) and Spring Boot (Backend).
 - Designed and consumed REST APIs, ensuring efficient client-server communication.
 - Integrated MySQL database for secure storage and efficient retrieval of user records.
 - Developed reusable and responsive UI components to enhance user experience. Improved application performance by optimizing database queries and backend logic.
- Expense Tracker Application** | *Java Core, Maven, JDBC, MySQL, Git*
- Developed a Java-based application to record, categorize, and manage daily expenses efficiently.
 - Implemented CRUD operations using JDBC with MySQL for reliable and persistent data storage.
 - Used Maven for dependency management and build automation to maintain a clean project structure.
 - Applied object-oriented design principles with proper exception handling to ensure application stability.
- Avain Labs International, Ongoing Project** | *Java, Springboot, React JS, MySQL, Postman*
- Frontend: React.js (for dynamic UI and reusable components)
 - Backend: Spring Boot (for REST APIs and business logic)
 - Database: MySQL (to manage product and category data), Authentication (optional): JWT (for admin panel)
- AI Chatbot Automation Platform** | *Tech Stack: n8n, OpenAI/Gemini API, REST APIs, Webhooks, JSON, AI Agents*
- Developed an AI-powered chatbot using n8n by integrating LLMs (OpenAI/Gemini) for intelligent, context-aware conversations. Designed automated workflows using AI Agent, chat memory, triggers, and conditional logic.
 - Integrated external applications through REST APIs, HTTP Request nodes, and webhooks for seamless automation.

TECHNICAL SKILLS

Languages: Java, SQL
Frameworks: Spring Boot,
Developer Tools: Git, Git Hub, VS Code, Postman, Eclipse, Wordpress, LLM
Libraries: React.js
Coursework: Database Management Systems, SDLC, Agile, Object-Oriented Programming, AI, CRM, ERP, Generative AI, Agentic AI.

CERTIFICATIONS

Full Stack Developer | *Hoping Minds*
SQL Essentials for Data Analytics | *Mind Luster*

ACADEMIC ACHIEVEMENTS

Finalist at SAP Hackfest
Winner at TECHATHON 2.0
Winner at Web Designing competition
